REPORT NO.

25X1

DO NOT CIRCULATE

The following figures indicate the number of freight cars unloaded each day at the Kuncice railroad station (051/060) and nearby stations during the period 17 March to 7 April 1952. Coal and ore unloadings are not included in the tabulations. A critical transportation situation has been created in Czechoslovakia as a result of poor organization in the unloading process and of a shortage of workers. To date, none of the regulations which have been initiated by the CSD (Czechoslovak Railways) has been successful in alleviating the situation, which bids fair to worsen.

<u>Date</u>	<u>Number of Cars Unloaded</u>
